

Questioz Researcher Profile

Raphael Antonio V. Morallo

High School: PAREF Southridge School

Class: 2016 (Recently graduated)

Research areas (as featured on Questioz):

1. Humanities (“Hamlet as a Foreshadowing of the Modern Consumerist Psychology”)
2. Social Sciences (“Music Preferences and Career Plans”)
3. Engineering (“Electric Vehicles Powered by Friction”)

Email ID: ravmorallo@gmail.com

Facebook Page: Raphael Morallo (www.facebook.com/rmorallo)

Twitter: @r_mor

Raphael is a most-viewed writer in the ‘classmates’ and ‘The High School Experience’ categories on Quora.

This is what he has to say about his interest in:

1. Humanities
 - a. My school’s curriculum has a strong emphasis on subjects such as Literature, Philosophy, and Theology. This exposes the students of the school to a rich perspective of the Humanities. I personally enjoyed reading “Hamlet” as it was discussed in class, and thus I was able to pour out some of my most interesting observations in the research.
2. Social Sciences
 - a. All students on their final year must complete and defend a research paper as a requirement for graduation. My research teacher would always remind us that the paper was “a culmination of your twelve years in Southridge and proof that there is something in between your ears.”
3. Engineering
 - a. This was an investigatory project during Year IV. I found this concept as interesting as I did compelling and ambitious. I am about to start a five-year Mechanical Engineering course in the University of the Philippines, so I think this research was a decent start to engineering.

Mentors:

1. Humanities – Mr. Eugene Salazar, Literature Teacher
2. Social Sciences – Mr. Gino Luayon, Research Teacher and High School Principal
3. Engineering – Mr. Niel Caidic, Laboratory Chemistry Teacher

Previous publication or recognition: The research “Electric Vehicles Powered by Friction” was sent as an entry to the 10th SEAMEO Search for Young Scientists Regional Congress in 2016. The research qualified to be presented in the Exhibition Category of the conference.
